

MH/LW/NSI 013 19

02 May 2019

**To: All NACOSS Gold and Systems Silver approved companies and Applicants**

Dear Colleague,

**IMPLEMENTATION OF BS EN 50131-2-2:2017 ALARM SYSTEMS. INTRUSION AND HOLD-UP SYSTEMS. PART 2-2: INTRUSION DETECTORS. PASSIVE INFRARED DETECTORS**

The new edition of BS EN 50131-2-2 was published in January 2018 and supersedes BS EN 50131-2-2:2008, which is now withdrawn.

BS EN 50131-2-2 has been drawn up to provide requirements for manufacture and certification testing of Passive Infrared Detectors - the 2017 edition brings about only minor changes aimed at improving clarity, refining testing criteria and better defining documentation requirements.

**This new edition as a product standard will have limited impact on installations compliant with PD 6662.**

**Where is the standard available?**

- The standard is available for you to download from the NSI website if you are a subscriber to the NSI standards service.
- Hard copies of the standard can be purchased directly from BSI or can be ordered through NSI at a discounted cost to yourself.

**Questions or Queries?**

If you have any questions or queries regarding the implementation of the new requirements, please do not hesitate to contact me.

Yours sincerely,

Matthew Holliday  
Technical Manager
