

MH/LW/NSI 014 19

02 May 2019

**To: All NACOSS Gold and Systems Silver approved companies and Applicants**

Dear Colleague,

**IMPLEMENTATION OF BS EN 50131-6:2017 ALARM SYSTEMS. INTRUSION AND HOLD-UP SYSTEMS. PART 6: POWER SUPPLIES**

The new edition of BS EN 50131-6 was published in February 2018 and supersedes BS EN 50131-6:2008+A1:2014, which is now withdrawn.

The revision of BS EN 50131-6 was to make the document less technology specific and more inclusive of the different types of power supplies to be found in I&HAS and the different types of technologies that are, and can be, employed within a power supply. It will make the document easier to use and more clearly applicable to the range of PSU configurations to be found in I&HAS.

**This new edition as a product standard will have limited impact on installations compliant with PD 6662.**

**Where is the standard available?**

- The standard is available for you to download from the NSI website if you are a subscriber to the NSI standards service.
- Hard copies of the standard can be purchased directly from BSI or can be ordered through NSI at a discounted cost to yourself.

**Questions or Queries?**

If you have any questions or queries regarding the implementation of the new requirements, please do not hesitate to contact me.

Yours sincerely,

Matthew Holliday  
Technical Manager
