

LW/KL/NSI 025 20

19 June 2020

To: All NSI NACOSS Gold, Systems Silver, Fire Gold and Fire Silver companies

Dear Colleague,

UPDATES TO CERTIFICATES OF COMPLIANCE

Updates have recently been made to all NSI Certificates of Compliance following consultation with a number of approved companies, both to enhance the perceived value of the certificate and to improve user experience.

When issuing a new certificate, you will now be able to use an address finder to select the correct address from a list based on the postcode you provide. This will help reduce user errors and the time required to complete this section.

To enhance the look of the certificate and increase its authenticity, the name provided will automatically be added to the certificate in a signature font, demonstrated in the example on the next page.

Furthermore, companies approved to Fire Gold and Fire Silver can now purchase their Fire Modification certificates online.

We welcome feedback on the recent updates and also any suggestions for future improvements. If you would like to comment, please don't hesitate to contact me directly.

Yours sincerely,

Laura Welford
Quality Manager

NATIONAL SECURITY INSPECTORATE NACOSS GOLD-APPROVAL SCHEME CERTIFICATE OF COMPLIANCE IN RESPECT OF SECURITY SYSTEM INSTALLATION

The National Security Inspectorate (NSI) is the UK's leading independent certification body approving companies in the security and fire sectors. Only NSI approved companies with the correct scope of approval are authorised to issue this Certificate of Compliance.

IMPORTANT NOTE: Your theft insurance cover may be invalid unless your security system is covered by a current maintenance service agreement complying with the Rules of NSI.
