

FTTP Priority Exchanges: List of Exchanges where order restrictions will be / are applied

Introduction and handy reading tip

This is an Openreach ancillary document. It contains important information about our plan towards implementing Stop Sell in FTTP priority exchanges which our customers ("you") need to understand. As we introduce, or amend the notified FTTP priority exchanges we will make changes to this document in line with the change process for ancillary documents

This document provides a list of FTTP priority exchanges where order restrictions have either been notified or have been applied.

Stop sell will apply at a premises level only where that premises has access to an available GEA-FTTP product.

Where a premises has access to GEA-FTTP, stop sell of non GEA-FTTP products will apply and no new supply will be available, including: CP transfers, working line takeovers, addition of broadband to voice lines, bandwidth modify, start of stopped lines or migrations to non GEA-FTTP products.

If a premises has GEA-FTTP available to order then only GEA-FTTP will be available for new supply. As GEA-FTTP becomes available at additional premises post stop sell, these premises will come within scope of the stop sell immediately.

If a premises does not have access to GEA-FTTP, then the following products will still be available: SOGfast, Gfast, SOGEA, GEA-FTTC, SOTAP (when launched and where no fibre is available), MPF and WLR (until September 2023).

Exceptions to the process are currently being discussed with industry.

No.	Exchange name	Exchange location	Stop Sell date
1	Salisbury	Wiltshire	01-Dec-20
2	Swansea	Swansea	29-Jun-21
